## BU Powder Coatings

Interpon 610 - ML407JR ral 7035 river texture

**AkzoNobel**  
Tomorrow's Answers Today

**Product Description** **Intepon610** is a series of polyester based powder coatings, formulated without the use of TGIC, designed for the exterior environment, offering excellent light and weather resistance from a single coat finish on a variety of substrates.

**Intepon 610** powders are available in a wide range of colours in gloss, satin, matt, aluminium and textured effects and can be custom matched to the user's requirements.

<b>Powder Properties</b>	<b>Chemical type</b>	Polyester
	<b>Particle Size</b>	Suitable for electrostatic spray
	<b>Specific gravity</b>	1.2-1.8 g/cm <sup>3</sup> depending on colour
	<b>Storage</b>	Dry cool conditions below 25°C
	<b>Shelf life</b>	12 months
	<b>Sales Code</b>	M-series
	<b>Stoving schedule</b> <sup>(a)</sup>	15 minutes at 190°C
	(object temperature)	10 minutes at 200°C
		8 minutes at 210°C

a) For high reactivity (HR) powders see overleaf

**Test Conditions** The results shown below are based on mechanical and chemical tests which (unless otherwise indicated) have been carried out under laboratory conditions and are given for guidance only. Actual product performance will depend upon the circumstances under which the product is used.

<b>Substrate</b>	Mechanical tests: Gold Seal polished steel
	Chemical & durability tests: Gold Seal lightweight
<b>Pretreatment</b>	Zinc phosphate
<b>Film Thickness</b>	60 microns
<b>Stoving</b>	10 minutes at 200°C (object temperature)

<b>Mechanical Tests</b>	<b>Adhesion</b>	BS EN ISO2409 (2mm Crosshatch)	Gt 0
	<b>Erichsen Cupping</b>	ISO1520	Pass >7mm
	<b>Hardness</b>	BS EN ISO 1518 (2000gms)	Pass - no penetration to substrate
	<b>Impact</b>	BS3900-E3	Pass 2.5mm direct and reverse
	<b>Flexibility</b>	ISO6860 (Conical Mandrel)	Pass 3mm

<b>Chemical and Durability Tests</b>	<b>Salt Spray</b>	ISO7253 (250 hours)	Pass - no corrosion creep more than 2mm from scribe
	<b>Cyclic Humidity</b>	BS3900-F2 (1000 hours)	Pass - no blistering or loss of gloss
	<b>Distilled Water Immersion</b>	BS3900-F7 (240 hours)	Pass - no blistering or loss of gloss
	<b>Exterior Durability</b>	Excellent - no chalking, slight loss of gloss after 12 months continuous exposure but no film breakdown or reduction in protective properties	
	<b>Chemical Resistance</b>	Generally good resistance to acids, alkalis and oils at normal temperatures	

**Pretreatment**

Aluminium, steel or Zintec surfaces to be coated must be clean and free from grease. Iron phosphate and particularly lightweight zinc phosphating of ferrous metals improves corrosion resistance. Aluminium substrates may require a chromate conversion coating.

**Application**

**Interpon 610** powders can be applied by manual or automatic electrostatic spray equipment. It is recommended that powder film thickness be between 60-110 microns. Unused powder can be reclaimed using suitable equipment and recycled through the coating system. For the metallics we suggest to avoid any recycling of powder. For "special effect" any variation in application (tribo / corona; voltage) can bring to differences in final finish. The actual application parameters must be adapted and adjusted depending on the type of components and with each powder batch in order to give a finish in accordance with our colour standard.

**Additional**

**Interpon 610** powders are available in bright aluminium finishes which are susceptible to scratching and finger marking. Protection by use of a clear polyester top coat is recommended when the coated article is to be subjected to physical damage or outdoor environments. Unprotected bright metallic finishes are prone to darkening in an outdoor environment. The top coat should ideally be applied within 2 hours of the metallic coating and gloves should be worn when handling the metallic coated articles. For further details on the use of metallic powder coatings please contact Akzo Nobel.

**Interpon 610HR** (High Reactivity) powders are also available in selected grades for use where a lower stoving temperature or shorter curing schedule is required.

**Sales code:** N-Series

**Stoving schedule:** 15 minutes at 160°C

(object temperature) 8 minutes at 180°C

**Shelf life:** 12 months

**Safety Precautions**

Please consult the Material Safety Datasheet (MSDS)

**FOR PROFESSIONAL USE ONLY**

**IMPORTANT NOTE** The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
